*For study abroad planning for other academic years, please see your Academic Advisor.

The example above is how a study abroad experience can fit into a four year program. When studying abroad, it's important to keep these key points in mind:

- In order to have more choices available for programs and courses abroad, it's recommended that students study abroad during their sophomore or junior year or during the summer following sophomore year.
- Students who are pursuing a foreign language minor may only do these courses abroad or a mix of foreign language and business courses.
